Item 3. Press Release

September 7, 2001

CDNX Trading Symbol: DML

Donner Minerals Ltd. announced that together with its majority owned subsidiary SVB Nickel Company Ltd. ("SVBN"), Northern Abitibi Mining Corp. ("Northern Abitibi"), Major General Resources Ltd. ("Major General") and Pallaum Minerals Ltd. ("Pallaum"), Donner has entered into an option earn-in agreement with Falconbridge Limited, whereby Falconbridge can earn a 50% interest in the entire South Voisey Bay Project by spending \$23 Million on exploration.

The ownership of SVBN is as follows: Donner Minerals Ltd. 76.69%, Cypress Development Corp. 11.36%, NDT Ventures Ltd. 6.55%, Rcom Venture Corp. 4.20%, Curion Ventures Corp. 1.20%.

The South Voisey Bay Project is comprised of the following properties:

- 1) Twenty licences covering about 549.5 km² held 100% by SVBN with the exception of a 37.5 km² portion in which Pallaum has a 25% interest (the "SVBN Property");
- 2) One licence covering about 39.5 km² owned 52.41% by Donner and 47.59% by Northern Abitibi (the "Donner/Northern Abitibi Property");

- 3) One Licence covering about 35.5 km² and owned 52.06% by Donner and 47.94% by Major General (the "Donner/Major General Property").

The SVBN Property, the Donner/Northern Abitibi Property and the Donner/Major General Property, ("the Combined Property") is centered 75km west of the Labrador Sea coast, 90 km south of Inco's Nickel-Copper-Cobalt deposits at Voisey's Bay.

Falconbridge has the option to earn a 50% participating joint venture interest in each of the three Properties (the "Option") for a period from September 1, 2001 to December 31, 2006 (the "Option Period") by incurring the following expenditures on exploration and related work ("Expenditures") on or before the end of the Option Period:

- 1) In order to vest its 50% interest in the SVBN Property, Falconbridge is required to incur \$14,000,000 of Expenditures on the SVBN Property.
- 2) In order to vest its 50% interest in the Donner/Northern Abitibi Property, Falconbridge is required to incur \$5,000,000 of Expenditures on the Donner/Northern Abitibi Property.
- 3) In order to vest its 50% interest in the Donner/Major General Property, Falconbridge is required to incur \$4,000,000 of Expenditures on the Donner/Major General Property.

In order to keep the Option in good standing, Falconbridge will incur a total of at least \$2,000,000 of Expenditures on the Combined Property on or before December 31, 2002 and \$2,000,000 in each of the subsequent calendar years during the Option Period on the Combined Property. Falconbridge may abandon its Option on one or more of the Properties or parts thereof at any time during the Option Period. Falconbridge will be the operator during the Option Period. A management committee will be formed comprising all of the parties to develop and finalize all exploration programs.

Teck Corporation is also a signatory to the agreement discussed above and retains its right to earn 50% of Donner's interest in any deposits discovered and developed on the Combined Property, after adjusting for Falconbridge's 50% interest in the property. Teck can earn this interest by funding Donner's share of feasibility costs and arranging Donner's share of production financing.

As part of Donner's continuing efforts to build a strong working relationship with the Innu Nation, Donner and Falconbridge are close to finalizing agreements to address environmental and archaeological issues and Innu business and employment opportunities at South Voisey Bay.

Falconbridge and Donner believe that the South Voisey Bay project is a high-quality Nickel-Copper-Cobalt exploration project that will require a strong commitment over the next few years. Falconbridge and Donner will dedicate to the project an experienced exploration team with expertise in nickel deposits, closely integrating geology, geophysics and geochemistry. Deep-seeking geophysics will be very important to the South Voisey Bay Project. Falconbridge has been using a number of innovative geophysical methods specifically designed to find massive sulphide nickel in Sudbury, Raglan and elsewhere worldwide. Advanced geophysical methods integrated with expert geological knowledge of magmatic systems and nickel deposits are assets that Falconbridge will bring to this project in order to find an ore body at South Voisey Bay. Falconbridge will also bring its expertise in developing and operating mines, smelting, refining and marketing Nickel, Copper, Cobalt and Platinum Group Metals. Falconbridge is focused on profitably growing its nickel business and is interested in discovering and developing new supplies of nickel sulphide ore in Canada. This will be an important exploration project for Falconbridge.

Archaeological work will begin immediately and starting in early October, Falconbridge will carry out gravity and deep-seeking EM, together with geological mapping and re-logging of drill core. Falconbridge will then review and integrate all exploration data over the winter in order to plan and carry out a substantial drill program next spring.

Donner Minerals Ltd. announced that Donner, Falconbridge Limited and the Innu Nation have finalized agreements that address environmental and archaeological issues and Innu business and employment opportunities at South Voisey Bay.

Following successful meetings in Ottawa, Mr. Peter Penashue, President of the Innu Nation, stated, "Our agreements set the standard for building respectful relationships between the mining industry and Aboriginal people, and we are pleased to welcome these forward-thinking companies to our territory."

Mobilization of work crews is presently underway. Archaeological work has begun and will be followed shortly with gravity and deep-seeking EM, together with geological mapping and re-logging of drill core. Results from this season's field program will be integrated with existing exploration data over the winter in order to plan and carry out a substantial drill program next spring.

NEWS RELEASE

David Patterson, CEO of Donner Minerals Ltd. is pleased to announce that the Company has engaged Holtermann & Team ('Holtermann') of Frankfurt, Germany to provide public relations for an initial term of 4 months. Holtermann will focus on servicing the Company's European shareholders and introducing and presenting the Company to interested investors. The Company has agreed to pay Holtermann \$7,500 USD per month and has granted Alexander Holtermann of Holtermann & Team 250,000 stock options with an exercise price of \$0.32 and expiring February 13, 2004.

In addition, the Company has granted 100,000 stock options to a consultant with an exercise price of \$0.32 and expiring February 13, 2004.

The public relations agreement and the stock option grants described above are subject to the approval of the Canadian Venture Exchange.

Donner and Falconbridge to Explore for Extension of Thompson Nickel Belt

NEWS RELEASE

Harvey Keats, President of Donner Minerals Ltd. is pleased to announce that the Company and Falconbridge Limited have entered into an agreement for the exploration of an interpreted extension of the Thompson Nickel Belt. Falconbridge holds three permits, known as the Stephens Lake Property (the 'Property'), covering 1,898 square kilometers and 110 kilometers of strike length along the newly interpreted extension of the Thompson Nickel Belt. The interpreted extension is known as the Stephens Lake Belt.

The Thompson Nickel Belt, located in central Manitoba, is one of the most important nickel producing regions in the world. It is an elongated, highly deformed, Proterozoic, rift controlled, sedimentary basin at the western margin of the Archean Superior Craton. Since Inco discovered the Thompson deposit in the late 1950's, numerous deposits have been discovered in the belt over a distance of 200 kilometers. There has been significant production from five main deposits to date, with production and reserves in excess of 170 million tonnes. The largest is the Thompson deposit with production plus reserves estimated to be in excess of 100 million tonnes at an average grade of 2.5% nickel.

The search for the northeast extension of the Thompson Nickel Belt by Inco, Falconbridge and other nickel producers has focused almost entirely on the Fox River Belt, conventionally interpreted to be at the margin of the Superior Craton. The Fox River Belt is now recognized as having favourable geology for nickel sulphide mineralization. However, the mineral potential of the Stephens Lake Belt had not been recognized in the past and so no prior exploration was carried out in the area.

In 1999 the Manitoba Government and the Geological Survey of Canada released newly compiled and re-processed airborne magnetic data. Using this and other data, Falconbridge recognized that the geophysical signature of the Stephens Lake Belt is very similar to the signature of the Thompson Nickel Belt, and interpreted it to be an extension of the geology that hosts the Thompson deposits. This interpretation opens the potential for discovering a new nickel camp in a totally unexplored area.

The deposits in the Thompson Nickel Belt occur in ultramafic rocks, often in proximity to sulphide iron formation. This is an important relationship, since the ultramafic rocks provide the source for the nickel and the sulphide iron formation provides the sulphur required to form nickel sulphide deposits. The deposits are magnetic and conductive and appear as coincident magnetic highs and conductors on magnetic and electromagnetic surveys.

The Stephens Lake Belt is almost completely covered by till, however one outcrop of sulphide iron formation

THE CANADIAN VENTURE EXCHANGE HAS NOT REVIEWED AND DOES NOT ACCEPT RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF THIS RELEASE

Donner Minerals Ltd.

*Suite 1360, 605 Robson Street, Vancouver, British Columbia Canada V6B 5J3
Telephone: (604) 683-0564 Fax: (604) 602-9311 or Toll Free: 1-800-909-8311
E-mail: donner@bed-rock.com or Web: <http://www.donner-minerals.com>*

was found near the southern margin of the Property on Stephens Lake by Falconbridge last summer. This key piece of evidence supports the interpretation that the Stephens Lake Belt is the extension of the Thompson Nickel Belt.

An airborne (GEOTEM) electromagnetic and magnetic survey will begin shortly at an estimated cost of \$750,000. Any coincident magnetic highs and conductors will be prime drill targets for the discovery of nickel sulphide deposits.

Donner has the option to earn a 50% participating joint venture interest in the Property by incurring a total of \$5 million of expenditures on exploration and related work on or before the end of December 31, 2006. Donner is required to incur a minimum of \$1,000,000 of expenditures per calendar year to keep the option in good standing. These expenditures may be accelerated, at Donner's option, and applied to future years' expenditure requirements.

Upon Donner deciding to incur each \$1,000,000 of expenditures, Falconbridge will contribute to exploration funding by participating in private placements in Donner as follows:

- \$250,000 of the first million dollars in expenditures
- \$300,000 of the second million dollars in expenditures
- \$350,000 of the third million dollars in expenditures
- \$400,000 of the fourth million dollars in expenditures
- \$450,000 of the fifth million dollars in expenditures

All private placements will be priced in accordance with Canadian Venture Exchange policy.

Exploration will be carried out by Falconbridge, under the direction of a Management Committee comprised of one representative from each of Donner and Falconbridge. Falconbridge will be entitled to charge an administrative and overhead charge of 10% of direct project costs during the option period.

As long as Falconbridge has at least a 30% interest in the Property, Falconbridge will be entitled to designate the treatment facilities to be used for processing the ore and other mineral products, and market such products for the Joint Venture, at rates, charges and costs competitive for the industry.

Provided Falconbridge has at least 30% interest in the Joint Venture, Falconbridge will be entitled to designate all or any part of the Property as a Specific Project, and will have the right to earn an additional 20% interest in the Specific Project by carrying out a Bankable Feasibility Study, and to be operator on the Specific Project. Falconbridge shall have the right to earn an additional 5% interest by arranging debt financing and bank guarantees for both parties for the development of the Specific Project through to commercial production.

Donner and Falconbridge both have a right of first refusal to purchase all or any part of the other party's interest in the Joint Venture.

NEWS RELEASE

Mr. David Patterson, Chief Executive Officer of Donner Minerals Ltd. announces that the Company has negotiated a non-brokered private placement in the amount of \$1,600,000. These funds will be raised by the Company issuing a total of 4,000,000 units at a price of \$0.40 per unit. Each unit is comprised of one common share and one non-transferable share purchase warrant entitling the holder to purchase one additional common share of the Company at a price of \$0.44 for two years. A portion of the units will be flow through units. A finder's fee is payable on a portion of the funds raised in the private placement.

The private placement is subject to the approval of the Canadian Venture Exchange.
